

Company Description

Tube Technologies has an established reputation in the Water Well Industry. Our Company has worked with hundreds of customers across the globe and have sold over thousands of rods over the last 3 decades. We understand the importance of quality and durability of these rods to our clients. We utilize the best carbon alloy steel and then enhance and maximize its strength and durability.

Tube Technologies' is centrally located at Minneapolis, Minnesota, USA and is the Part of Jindal Saw Limited, India (A total Pipe Solution Company). We are part of an \$ 22 Billion conglomerate called, OP Jindal Group, which is a multi-product, multi-location, group which owns and operates steel plants.

Tube Technologies is an ISO 9001:2015 certified company and a member of NGWA.

Tube Technologies manufactures a full range of water well drill pipes having outside diameter from 2 3/8" to 7 5/8" and wall thickness from 0.190"-1.0" These drill pipes are available in plain ends and upset ends as well.

Tube Technologies tool joints are made out of 4140 and 4137 heat treated material and are Inertia welded onto a seamless N-80 mid body tube. Other steel grades are available on request.

Tube Technologies uses state of the art CNC machines for all of our threading. This provides us with a consistent level of precision, and accuracy.

Subs & Adaptors

Tube Technologies manufactures custom designed Bit Sub, Shock Subs, Cross Over Subs, Saver Sub, for almost all the makes and model of rigs.

We manufacture our subs using high-quality alloy steel and machine them on CNC lathes for precision threading maximizing their operational life.

Drill Collars, Stabilizers & Augers

Drill Collars

Made by machining solid bars of steel, drill collars are thick-wall tubulars that help break up the rock below by adding weight to the lower end of the assembly. Available in a variety of designs and specifications. Each of our drill collar's connections is cut in-house using constant profile cutting tools.

Augers

Tube Technologies Manufacturers drill rods with augers. These augered drill rods are used for soil sampling before drilling.

Augers are available with all types of thread connection like API REG, API IF, etc.

STABILIZERS

Our stabilizers are manufactured to standard or custom sizes. We offer integral stabilizers with straight ribs. Tube Technologies stabilizers are manufactured from a thick-wall carbon alloy steel pipe. We can cut any thread and accommodate any size diameter upto 7 5/8".

Stabilizers are available with all types of IF, Regular, FH, FEDP, AOH connections.

Wrench flats can also be accommodated as per customer's requirement.

Tube Technologies offers hard facing on drill pipes, stabilizer as per customer's requirement.

Water Well

Drill Pipe

Tube Tech Water Well Drill Rods:

Tube Technologies offers drill rods range from 2.375" OD to 7.625" OD, with wall thickness of 0.190"-1.0". Both standard and custom breakout requirements can be manufactured

We manufacture drill pipes for rigs from Sandvik, Epiroc, Reichdrill, Ingersoll Rand, CAT, Drill-tech, Schramm, Foremost, Bauer, Versa Drill, Bucyrus, and many others

OD-inch	WT-inch	Length-Feet/Range	Thread Connections	Flat Types
